THE GEOMETRY OF LOVE Director nominated at Houston Worldfest

MOVING FILMS & LES PRODUCTIONS COLIN NEALE congratulate PAUL CARVALHO, the director of THE GEOMETRY OF LOVE, for his recent nomination at the HOUSTON WORLDFEST in the BEST DIRECTOR DOCUMENTARY (60 minutes or less) category. The WORLDFEST adjudication in other short film categories will be announced next week.

THE GEOMETRY OF LOVE is based on the best selling book by Margaret Visser and features the author as she embarks on an astonishingly expansive journey through the small church of Sant'Agnese fuori le Mura in Rome, whose story is really that of all churches, everywhere.

As writer and director of the film, Paul met the challenge of weaving the complex, diverse ideas of the book and Margaret's personal spiritual journey into a seamless narrative that captivates audiences.

His work was greatly assisted by a superb team including Craig Wroblewski (Photography) Frank Russo (sound) Mike Shields (music), Jamie Mallock (editor) and Margaret Visser whose original outlook on the world inspired us all.

We are delighted by the outcome.
